A Living Farm, Right In Your Classroom

Students grow kale, arugula and radish on a rack by the window, tend it every single day, and feed their families at Harvest Night. Four weeks, start to finish.

FOUR WEEKS, SEED TO SALAD

WEEK 01	WEEK 02	WEEK 03	WEEK 04
Kale	**Arugula**	**Radish**	**Harvest**
It all starts with a seed	Where does food come from?	Food is fuel	Taste what you grew

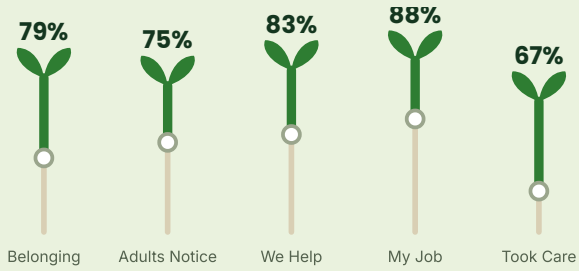
WHAT LANDS IN YOUR CLASSROOM

1. **Grow rack**
   LED lights, trays and a timer, ready to plug in
2. **Seeds & soil**
   Enough for up to 84 students
3. **48 activities**
   Teacher guides and student pages for every one
4. **Taste kit**
   Down to the plates, forks and dressing
5. **A real person**
   Setup help, how-to videos and someone to call

WITH DATA, WE SHOW BELONGING GROWS

Week 1 → Week 4

One private, five-item Check-In, before planting and before harvest.



Grey dot: week 1 · Leaf: week 4 · Agreeing = Mostly or Totally · Sample class

WHY THIS, WHY NOW

- Board-ready evidence for your annual report
- No district sign-off to wait on
- Fits practical life, stewardship, or any model you teach

BY THE NUMBERS

4 weeks, seed to salad	**48** hands-on activities
1 page brief for your plan	**5** streams of evidence

The story in your next report, with proof behind it.
