

Sponsor a classroom grow lab

A one-page ask to hand to a local business

The ask

For **\$1,000** (about \$12 per student), a local business can sponsor a full grow lab for my classroom of [X] students. That funds everything: the growing rack, seeds, and the standards-aligned lessons.

What the sponsor gets

- Recognition as the sponsor of our classroom
- Photos of my students with their harvest, theirs to share
- A window decal and a social-media shout-out
- A tax-deductible receipt (BYFP is a 501(c)(3))

Why a food business

Kids growing fresh food and learning where it comes from is a natural fit for a restaurant, market or grocer, and it is right in your own neighborhood.

How to say yes

Contact [teacher name] at [email/phone], or reach Boston Youth Farm Project at oliver@bostonyfp.org. We handle everything from there.
